Applicant  COOK INCORPORATED		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 4 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

## 1. Basis of the report

- a. With regard to the language, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.
  - The international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).
- b.  With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, see Box No. I.

2.  Certain claims were found unsearchable (See Box II).3.  Unity of invention is lacking (see Box III).

## 4. With regard to the title,

- the text is approved as submitted by the applicant.
- the text has been established by this Authority to read as follows:

## 5. With regard to the abstract,

- the text is approved as submitted by the applicant.

**Box No. IV Text of the abstract (Continuation of item 5 of the first sheet)**

An introducer sheath and a method of manufacturing an introducer sheath. The introducer comprises a first polymeric sleeve (34) having a first striped extrusion arranged in a generally helical pattern along the first sleeve. A second polymeric sleeve (30) is positioned over and bonded to the first polymeric sleeve, the second polymeric sleeve comprising a second striped extrusion that is arranged in a generally helical pattern along the second sleeve. The first and second polymeric sleeves are axially aligned such that the second striped extrusion is superposed over the first striped extrusion to define a generally braid-like configuration. The introducer sheath can optionally include an inner liner disposed within a lumen of the first polymeric sleeve, and/or a coil fitted over the inner liner, such that the first polymeric sleeve is bonded to the inner liner between turns of the coil.
